

ALLPLAN BIMPLUS

THE OPEN BIM PLATFORM FOR
SUCCESSFUL COOPERATION

ALLPLAN BIMPLUS RAISE YOUR LEVEL

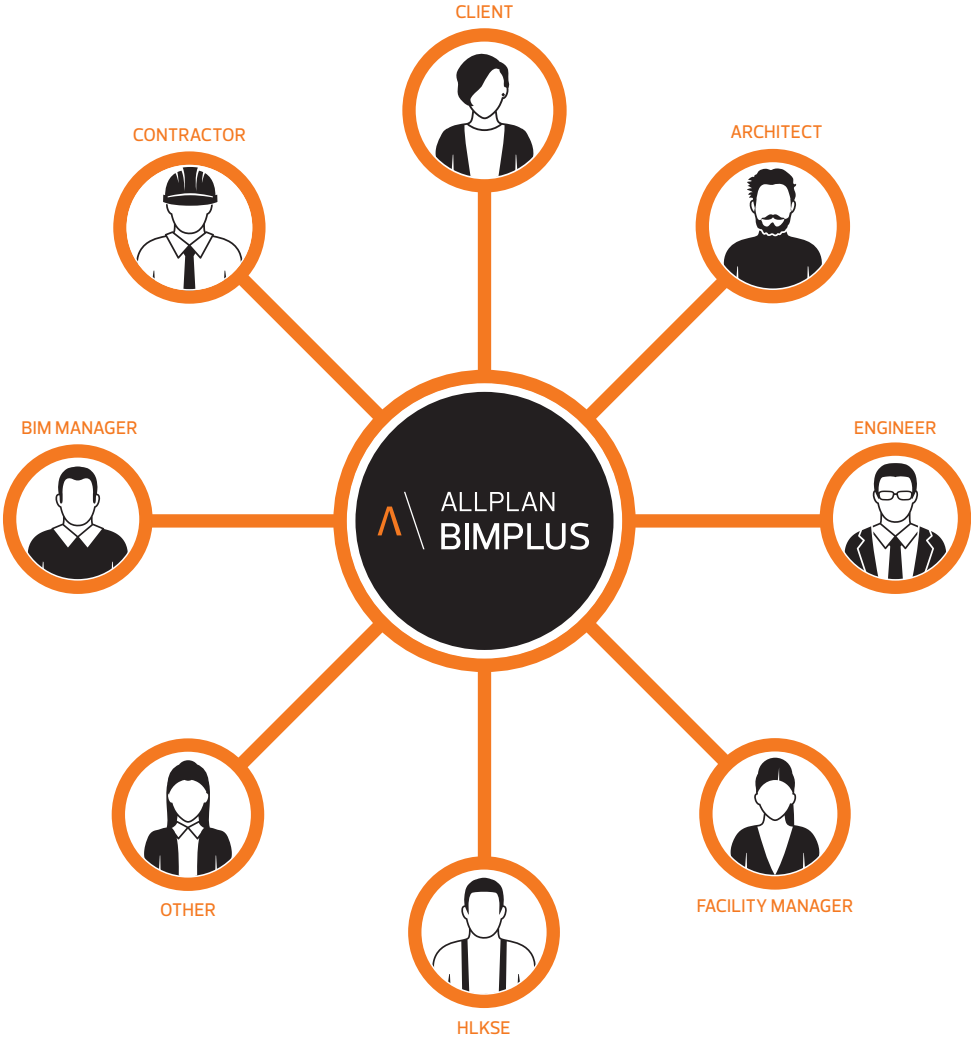

Allplan Bimplus is the open cloud-based BIM platform for all disciplines in order to work together efficiently in building projects. BIM model data, information, documents and tasks are centrally managed across the entire building life cycle. So that you easily get a handle on BIM:

-
- > Through real-time access to your projects across all end devices
 - > Through special applications for the construction industry
 - > Through open interfaces for all data formats
-

EFFICIENT PROCESSING OF CONSTRUCTION PROJECTS WITH ALLPLAN BIMPLUS

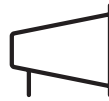

Realize construction projects faster, more cost efficient and with higher quality with Allplan Bimplus. Faster thanks to the simultaneous, location-independent access of all those involved in the project to the current planning status and the defined tasks. More cost-effective and higher quality, since planning inconsistencies can already be identified and rectified in due time before construction begins.

EFFICIENTLY CONTROL BIM PROJECTS

In the framework of the BIM working, with Allplan Bimplus construction projects can be controlled and monitored across the entire life cycle of a building. As a BIM manager, you execute efficient project management with Allplan Bimplus. You are always up-to-date and are able to always track and control open and closed tasks.

CLEARLY COMMUNICATE TASKS

The central BIM coordination model forms the basis for the cross-discipline cooperation: All relevant information is merged here and discrepancies are immediately made visible to everyone. The collision control supports you in Allplan Bimplus in the process. Using the task board in Allplan Bimplus, you quickly and clearly coordinate pending tasks with all those involved in the project. It is important that the individual specialist planners always have full control over their own sub-model in the process.

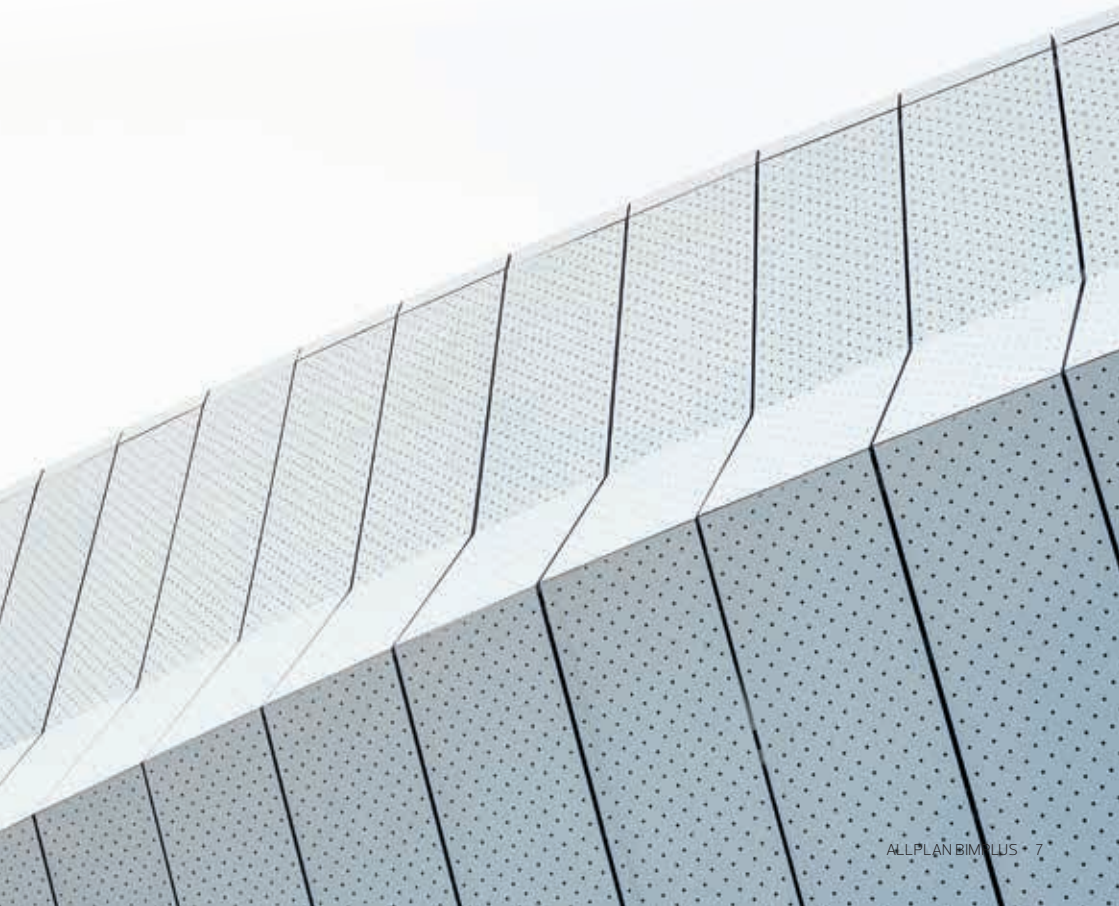

INTEGRATE DATA FROM VARIOUS SYSTEMS

The decisive advantage of Allplan Bimplus lies in the fact that data from any software in the construction industry can be integrated in Allplan Bimplus through the API interface. The information contained is merged into the central BIM coordination model and is visually displayed. This forms the basis for successful BIM management.

ACCESS PROJECT DATA ANYWHERE, ANYTIME

Does a question ever arise and you are not at your workplace? No problem: You can access Allplan Bimplus anywhere, anytime. And you can do this with any terminal device. Data can be visualized, shared and processed via a browser or an app. Allplan Bimplus is always wherever you need it.

ABOUT THE COMPANY

ALLPLAN is a leading European provider of open solutions for Building Information Modeling (BIM). For over 50 years, the company has been supporting the construction industry with a pioneering software portfolio and has been decisively driving the digitization of the construction industry: innovative and oriented to customer requirements – and with the best “made in Germany” quality.
